

Design Hamburgueria:

Para colocar formulários dentro do formulário principal vai precisar de um painel exemplo pnlContainer e um bunifuVScrollBar para navegar entre os formulários.

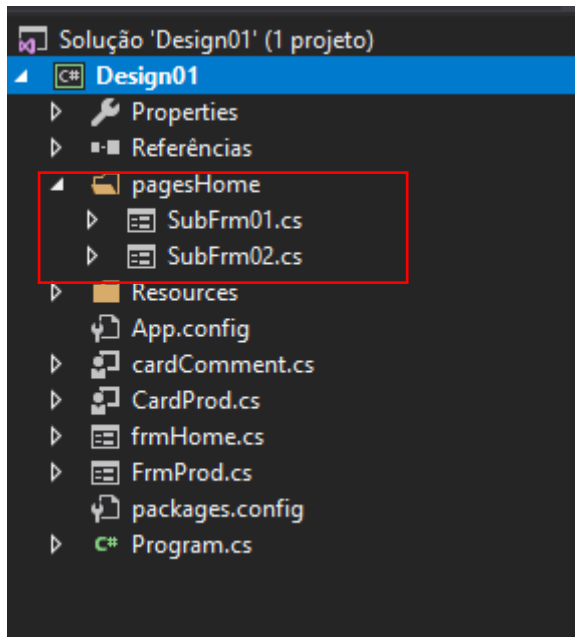

Adicione o painel na bunifuVScrollBar:

Tutorial sobre scrollbar : <https://docs.bunifuframework.com/en/articles/2270593-bunifu-scrollbar>

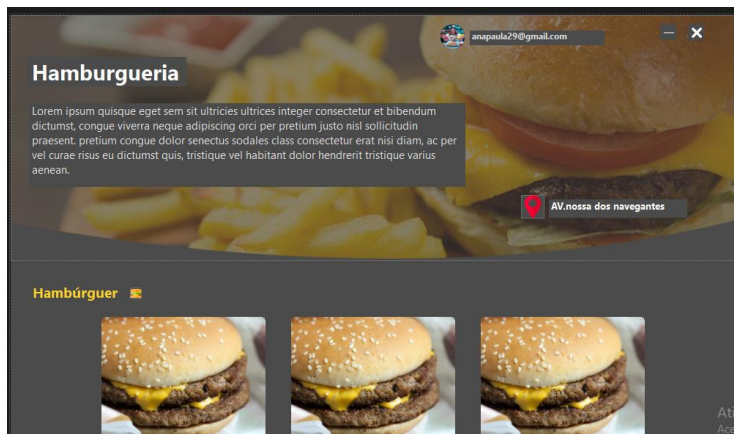

Formulários

Primeiro crie os formulários secundários do formulário principal.

Design Form :

SubFrm01

Ferramentas transparente dentro da pictureBox:

Adicione esse código no evento load do form.

```
pictureBox1.Controls.Add(label1);
pictureBox1.Controls.Add(label5);
pictureBox1.Controls.Add(label6);
pictureBox1.Controls.Add(label2);
pictureBox1.Controls.Add(pictureBox2);
pictureBox1.Controls.Add(btnClose);
pictureBox1.Controls.Add(btnWinMinus);

label1.BackColor = Color.Transparent;
label2.BackColor = Color.Transparent;
label5.BackColor = Color.Transparent;
label6.BackColor = Color.Transparent;
pictureBox2.BackColor = Color.Transparent;
btnClose.BackColor = Color.Transparent;
btnWinMinus.BackColor = Color.Transparent;
```

Card (UserControl) adicionado no form:

Crie um UserControl com:

bunifuEllipse

pictureBox,

3 Label

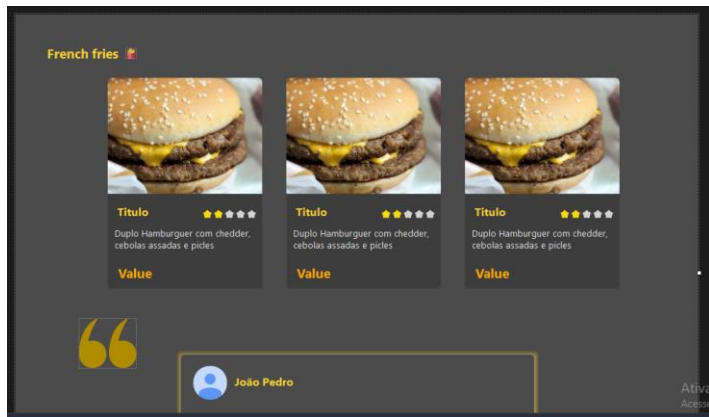

bunifuRating

Coloque a opção `mdifires public` na propriedade das label, pictureBox e bunifuRating, para poder editar os dados do UserControl no load do form

Adicionando os valores de cada card no load do form:

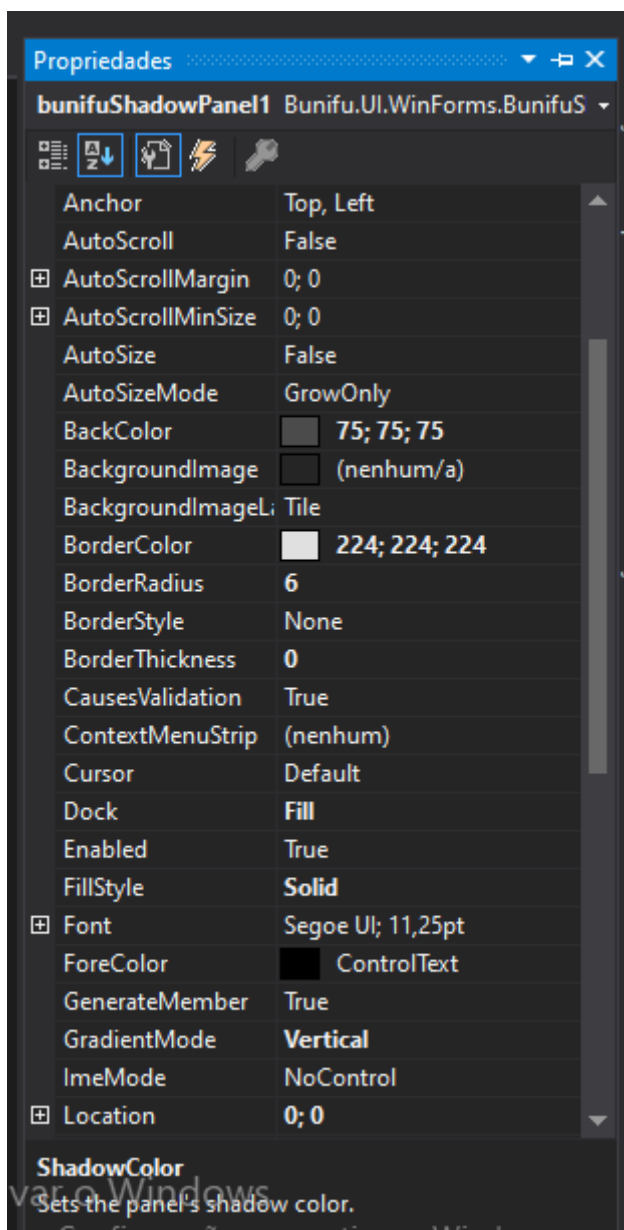

```
#region inserting values in cardProd.  
  
cardProd1.lblTitulo.Text = listTituloHamb[0];  
cardProd2.lblTitulo.Text = listTituloHamb[1];  
cardProd3.lblTitulo.Text = listTituloHamb[2];  
  
cardProd1.lblStatus.Text = listStatusHamb[0];  
cardProd2.lblStatus.Text = listStatusHamb[1];  
cardProd3.lblStatus.Text = listStatusHamb[2];  
  
cardProd1.lblValor.Text = listValuesHamb[0];  
cardProd2.lblValor.Text = listValuesHamb[1];  
cardProd3.lblValor.Text = listValuesHamb[2];  
  
cardProd1.statusRating.Value = listPoitsHamb[0];  
cardProd2.statusRating.Value = listPoitsHamb[1];  
cardProd3.statusRating.Value = listPoitsHamb[2];  
  
cardProd1.ptbImage.Image = listImageHamb[0];  
cardProd2.ptbImage.Image = listImageHamb[1];  
cardProd3.ptbImage.Image = listImageHamb[2];  
  
#endregion
```

SubFrm02

Crie um UserControl com:

bunifuShadowPanel,

bunifuPictureBox,

2x Label.

Design UserControl:

Adicionando os formulários no painel do formulário principal

```
private void Form1_Load(object sender, EventArgs e)
{
    // Insert pagas

    // page2
    SubFrm2 sub2 = new SubFrm2();

    sub2.TopLevel = false;
    pnlContainer.Controls.Add(sub2);

    sub2.Dock = DockStyle.Top;

    sub2.Show();
    //

    // page 1
    subFrmIndex sub = new subFrmIndex();

    sub.TopLevel = false;
    pnlContainer.Controls.Add(sub);

    sub.Dock = DockStyle.Top;

    sub.Show();
    //
    //
}
```
