

Design Hamburgueria:

To place forms inside the main form you will need a `pnlContainer` example panel and a `bunifuVScrollBar` to navigate between the forms:

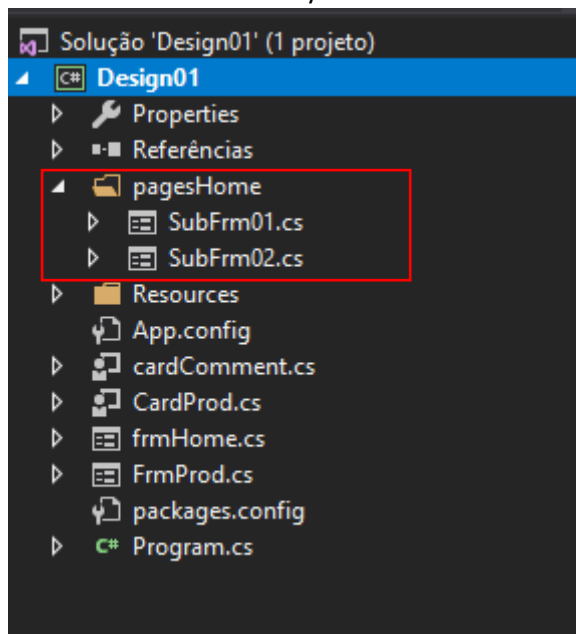

Add the panel to the `bunifuVScrollBar`:

Tutorial on scrollbar : <https://docs.bunifuframework.com/en/articles/2270593-bunifu-scrollbar>

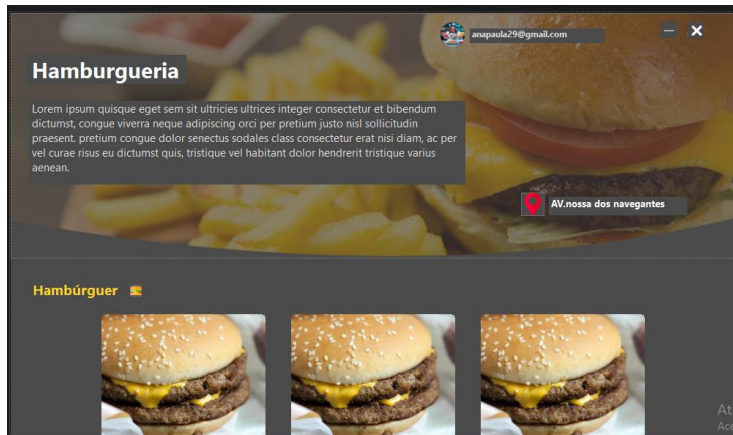

Forms

First create the secondary forms of the main form.

Design Forms:

SubFrm01

Transparent tools inside the pictureBox:

Add this code to the load event of the form:

```
pictureBox1.Controls.Add(label1);
pictureBox1.Controls.Add(label5);
pictureBox1.Controls.Add(label6);
pictureBox1.Controls.Add(label2);
pictureBox1.Controls.Add(pictureBox2);
pictureBox1.Controls.Add(btnClose);
pictureBox1.Controls.Add(btnWinMinus);

label1.BackColor = Color.Transparent;
label2.BackColor = Color.Transparent;
label5.BackColor = Color.Transparent;
label6.BackColor = Color.Transparent;
pictureBox2.BackColor = Color.Transparent;
btnClose.BackColor = Color.Transparent;
btnWinMinus.BackColor = Color.Transparent;
```

Card (UserControl) added to form:

Crie um UserControl com:

bunifuElipse

pictureBox,

3 Label

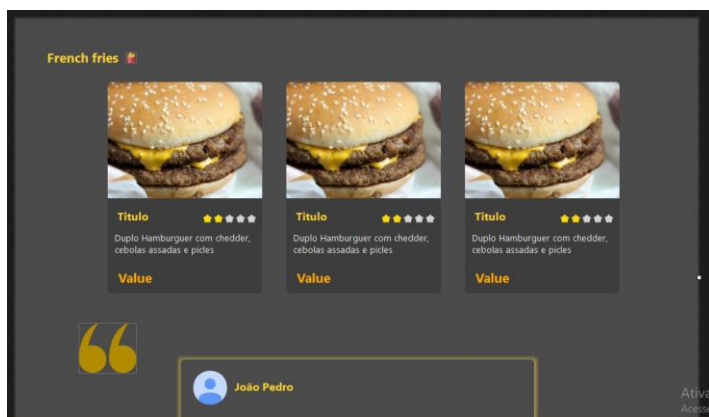

bunifuRating

Place the option modifies public in the property of the label, pictureBox and bunifuRating, to be able to edit the UserControl data in the form load.

Adding the values of each card to the form load:

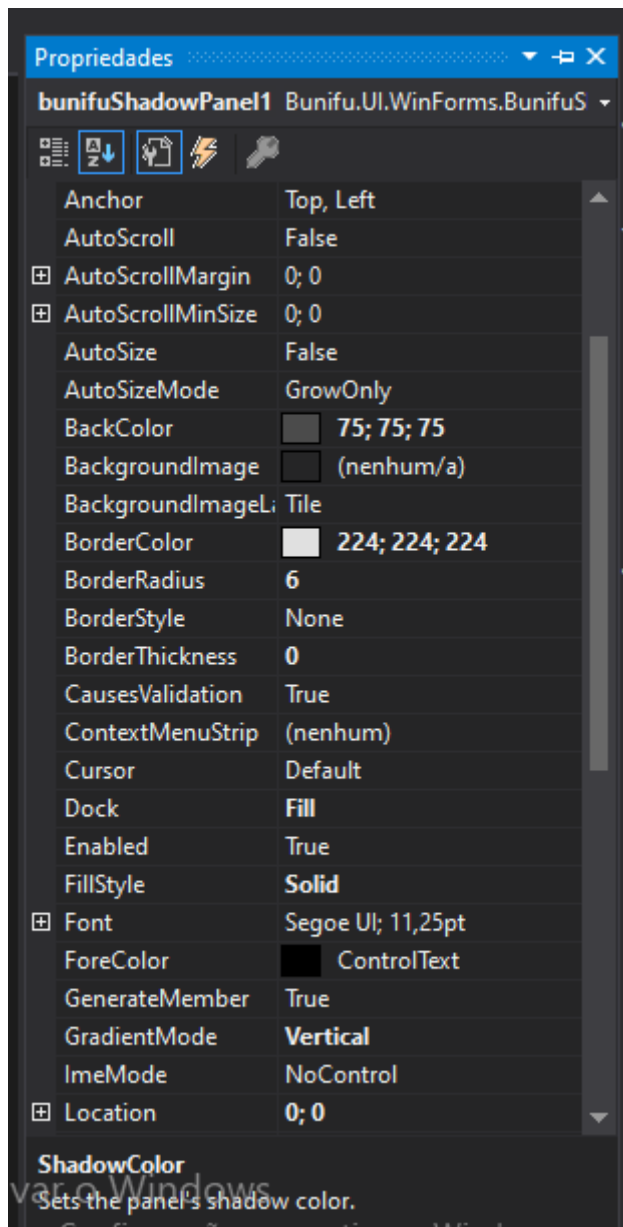

```
#region inserting values in cardProd.  
  
cardProd1.lblTitulo.Text = listTituloHamb[0];  
cardProd2.lblTitulo.Text = listTituloHamb[1];  
cardProd3.lblTitulo.Text = listTituloHamb[2];  
  
cardProd1.lblStatus.Text = listStatusHamb[0];  
cardProd2.lblStatus.Text = listStatusHamb[1];  
cardProd3.lblStatus.Text = listStatusHamb[2];  
  
cardProd1.lblValor.Text = listValuesHamb[0];  
cardProd2.lblValor.Text = listValuesHamb[1];  
cardProd3.lblValor.Text = listValuesHamb[2];  
  
cardProd1.statusRating.Value = listPoitsHamb[0];  
cardProd2.statusRating.Value = listPoitsHamb[1];  
cardProd3.statusRating.Value = listPoitsHamb[2];  
  
cardProd1.ptbImage.Image = listImageHamb[0];  
cardProd2.ptbImage.Image = listImageHamb[1];  
cardProd3.ptbImage.Image = listImageHamb[2];  
  
#endregion
```

SubFrm02

Create a UserControl with:

bunifuShadowPanel,

bunifuPictureBox,

2x Label.

Design UserControl:

João Pedro

Lorem ipsum cubilia aenean fusce nulla a fusce nostra libero feugiat aenean, elit blandit semper fringilla fermentum nisi sodales venenatis est consequat mattis donec, augue posuere dictumst condimentum est laoreet diam urna malesuada himenaeos.

Adding forms to the main form panel

```
private void Form1_Load(object sender, EventArgs e)
{
    // Insert pagas

    // page2
    SubFrm2 sub2 = new SubFrm2();

    sub2.TopLevel = false;
    pnlContainer.Controls.Add(sub2);

    sub2.Dock = DockStyle.Top;

    sub2.Show();
    //

    // page 1
    subFrmIndex sub = new subFrmIndex();

    sub.TopLevel = false;
    pnlContainer.Controls.Add(sub);

    sub.Dock = DockStyle.Top;

    sub.Show();
    //
    //
}
```
